S I R :

INFORMATION DISCLOSURE STATEMENT

Copies of two Search Reports are submitted herewith, namely a German Patent Office Search Report (2 pages) from the parallel German application 103 36 297.7, of which priority is claimed, listing 5 references and relevant portions, and an International Search Report (2 pages in English PCT/ISA/210) by the EPO (European Patent Office) as the international searching authority from the present international application listing 3 references and their relevant portions. Copies of the 3 references cited in the International Search Report are being submitted herewith.

In the International Search Reports the references listed in category A mean that these references define the general state of the art which is not considered to be of particular relevance with respect to the listed claims. The references listed in

category X means each document is of particular relevance; the claimed invention cannot be considered novel or can not be considered to involve an inventive step when the document is taken alone with respect to the listed claim. The International Search Report is also in English and points out relevance of the references so no further relevance is necessary to be pointed out.

In the German Patent Office Search Report the reference listed in category Y means that this document considered together with other document(s) place in question the presence of an inventive act and/or inventive step with respect to the listed claims. The references listed in category A mean these documents define the general background state of the art with respect to the listed claims. The reference listed in category D means this reference is already mentioned and discussed in the specification (discussed on pages 3+).

The relevance of the references is pointed out in the German Search Report in translation, namely in the German Patent Office Search Report the words "Kat." mean category, "Ermittelte Druckschriften/Erläuterungen" means transmitted publications/ explanations, "Betr. Ansprüche" means concerning claims. Two PTO-1449 forms are presented to list all 8 different references. 5 references from the German Patent Office Search Report and 3 references from the international search report are being submitted in copy herewith.

Translations of the foreign language references are not available  
to the undersigned.

This submission meets the requirements of 37 CFR §1.56, 1.97 and  
1.98(a) and MPEP 609.

Respectfully submitted  
Stefan Arns, et al
